Author Bowman, M.; Graham, J.H., Jnr.; Gantt, J.

Abstract: ...local emergency management organisations a US research consortium has developed and demonstrated robust and affordable mobile communications systems particularly well suited for field operation in rural communities. This paper describes the development and... ..by the US Department of Homeland Security. The result is a state-of-the-art mobile communications system that can be transported in a single small vehicle that upon arrival at an emergency...

system. The controller includes a memory for storing a plurality of addresses for each subscriber and... .. each subscriber, the controller, in response to a call directed to a subscriber, instructing the telephone switching system to connect the detected call to a selected one of the addresses stored in the memory, the selected one being... .. The invention provides a apparatus and method for processing number, receiving during said call after it has been answered... .. A personal telecommunications system, comprising: a telephone switching network connected to a plurality of telephones at locations designated by system subscribers; a personal transceiver assigned to each of the system subscribers, each said personal transceiver... .. an alternate manner of handling the incoming call placed by the caller to the personal telephone number of the subscriber; a telephone control system receiving the subscriber location signal, the subscriber instruction signal and the incoming call placed by the caller to the personal phone number assigned to the specific subscriber; said telephone control system selectively forwarding the received incoming call to the subscriber by routing the incoming call through telephone switching network to the telephone in proximity to the fixed transmitter indicated by the received...
